

Investment Policy Statement**Manulife Balanced Portfolio Segregated Fund****Investment Objective**

Unless otherwise noted, the investment objective of the Underlying Fund is the same or substantially similar as the segregated fund objective.

This Fund aims to provide a combination of long-term capital appreciation with a secondary focus on income generation. The Portfolio seeks to accomplish its objective by primarily investing in securities of Underlying Funds and/or ETFs. These Underlying Funds and/or ETFs generally invest in domestic and global equity securities and/or domestic and global fixed income securities.

Investment Strategy

This Fund will invest in units of the Manulife Balanced Portfolio, a mutual fund trust, or a substantially similar fund (the “Underlying Fund”).

The investment strategy of the Underlying Fund is to employ a strategic asset allocation process and has the ability to make tactical calls depending on its view on market conditions at a point in time.

The Underlying Fund primarily invests its assets in various Underlying Funds and/or ETFs, many of which are also managed by us. The Underlying Fund may also invest a portion of its assets in securities, guaranteed investment certificates, cash, and short-term money market instruments.

The Underlying Fund has allowable ranges for each asset class. These ranges are listed below.

	Minimum (%)	Maximum (%)
Fixed income	35	55
Equities	45	65

The percentages listed above are approximate due to continuous market fluctuations and administrative efficiencies. As a result, the actual percentages invested in the asset classes on any given day may not exactly conform to the percentages set forth above. Rebalancing will be done at the discretion of the portfolio advisor and portfolio sub-advisor.

For more information about investing in Underlying Funds, please see “Investments in Underlying Funds” in the Prospectus of the Underlying Fund.

The portfolio sub-advisor reserves the right to remove, replace, or add underlying investments from time to time to achieve the investment objectives.

Please see “Sustainability Integration” in the “Information Applicable to One or More Funds” section of the Underlying Fund’s Prospectus for more information about how the Underlying Fund uses ESG integration as part of its investment process.

The Underlying Fund may hold a portion of its assets in securities, guaranteed investment certificates, cash, or short-term money market instruments while searching for investment opportunities and/or due to general market, economic, or political conditions.

The Underlying Fund may deviate from certain investment restrictions in NI 81-102 to permit the Underlying Fund to invest up to 10% of its net asset value in certain non-prospectus qualified pooled funds managed by Manulife IM Limited or an affiliate of Manulife IM Limited.

The Underlying Fund may also invest up to 100% of its assets in other investment funds, including Underlying Funds and ETFs, that may or may not be managed by the Manager (or one of its affiliates or associates), in order to gain indirect exposure to appropriate markets, sectors, or asset classes. The Underlying Fund may invest in investment funds managed by unaffiliated investment managers if there are no suitable investment opportunities in affiliated funds. The Underlying Fund may also invest in additional types of ETFs and silver pursuant to regulatory relief or as permitted pursuant to NI 81-102, as described under “ETF Relief” in the Prospectus of the Underlying Fund. Investments by the Underlying Fund in securities of other investment funds and/or silver may be done directly or indirectly, through a specified derivative, or, in the case of silver, in silver certificates. Underlying Funds will be selected with consideration for the Underlying Fund’s investment objective and strategies, past performance and volatility, among other factors.

Please see “Investments in Underlying Funds” in the Prospectus of the Underlying Fund.

The Underlying Fund may invest in or use derivatives for hedging and non-hedging purposes in a manner consistent with the investment objective of the Underlying Fund and as permitted by applicable securities legislation or by the exemption described under “Derivatives Relief” in the Prospectus of the Underlying Fund. Derivatives may be used for hedging purposes in the event of significant cash flows into or out of the Underlying Fund and to provide protection for the Underlying Fund. Derivatives may be used for non-hedging purposes in order to invest indirectly in securities or financial markets and to gain exposure to other currencies. You will find more information about derivatives, including the types of derivatives expected to be used by the Underlying Fund, under “Derivative Risk” in the Prospectus of the Underlying Fund.

The Underlying Fund may also enter into securities lending, repurchase, and reverse repurchase transactions to generate additional income and/or as a short-term cash management tool. For more information see “Securities Lending, Repurchase, and Reverse Repurchase Transaction Risk” in the Prospectus of the Underlying Fund.

Risks

Where a segregated fund invests in units of an underlying fund, the segregated fund may be exposed to the risks associated with the Underlying Fund. Below is a list of principal risks for the underlying mutual fund(s) in which the Segregated Fund invests. For complete definitions of each principal risk, as well as risks common to all underlying mutual funds, refer to the general section of the mutual fund Prospectus.

- Asset-Backed and Mortgage-Backed Securities Risk
- Bail-In Debt Risk
- Capital Depletion Risk
- Commodity Risk
- Counterparty Risk
- Credit Risk
- Currency Risk
- Default Risk
- Derivative Risk
