

Investment Policy Statement**Manulife Global Unconstrained Bond Segregated Fund****Investment Objective**

Unless otherwise noted, the investment objective of the underlying fund is the same or substantially similar as the segregated fund objective.

This Fund aims to provide securityholders with monthly distributions and to preserve capital while providing the opportunity for long-term capital appreciation.

Investment Strategy

This Fund will invest in units of the Manulife Global Unconstrained Bond Fund, a mutual fund trust, or a substantially similar fund (the “Underlying Fund”).

The investment strategy of the Underlying Fund is to opportunistically invest across the spectrum of global government and corporate debt securities, of any quality or term. In addition, the portfolio sub-advisors will actively manage the fund’s regional, country and currency allocations, and may invest in securities from both developed and emerging markets. Investments of the Underlying Fund may include, but are not limited to (i) investment grade corporate bonds, (ii) high yield fixed income securities, (iii) bank loans and floating rate instruments, (iv) preferred shares, (v) convertible and hybrid securities, and (vi) government bonds.

A fundamental, bottom-up approach to security selection and portfolio construction will be employed by the portfolio sub-advisors in managing the Underlying Fund’s portfolio. The portfolio sub-advisors select individual securities based on fundamental analysis of individual issues. This analysis focuses on an assessment of the issuer’s financial position and operations, its competitive advantage and the depth of its management. Companies that have a sustainable business model, a compelling value proposition and/or strong cash flows are favoured. As part of the research process, the portfolio sub-advisors identify the most attractive part of the capital structure to invest in—from bank loans and senior notes to subordinated notes, convertible notes and preferred shares.

Please see “Sustainability Integration” in the “Information Applicable to One or More Funds” section of the Underlying Fund’s Prospectus for more information about how the Underlying Fund uses ESG integration as part of its investment process.

The Underlying Fund’s portfolio is exposed to foreign currency. The portfolio sub-advisors intend to use derivatives to actively manage currency exposure to seek to both protect and enhance Underlying Fund returns subject to the applicable rules of NI 81-102. From time to time, up to 100% of the value of the portfolio’s non-Canadian currency exposure may be hedged back to the Canadian dollar by the portfolio sub-advisors. Currency investments are opportunistic and designed to add value and further diversify the Underlying Fund’s positions.

The Underlying Fund may use derivatives such as, but not limited to, futures, options, swaps and forward contracts to hedge portfolio exposure against losses from foreign currency exposure as well as credit and interest rate risk.

The Underlying Fund may invest in or use derivatives for hedging and non-hedging purposes in a manner consistent with the investment objective of the Underlying Fund and as permitted by applicable securities legislation or by the exemption described under “Derivatives Relief” in the Prospectus of the Underlying Fund. Derivatives may be used for hedging purposes in

the event of significant cash flows into or out of the Underlying Fund and to provide protection for the Underlying Fund. Derivatives may be used for non-hedging purposes in order to invest indirectly in securities or financial markets and to gain exposure to other currencies. You will find more information about derivatives, including the types of derivatives expected to be used by the Underlying Fund, under “Derivative Risk” in the Prospectus of the Underlying Fund. You will find more information about derivatives, including the types of derivatives expected to be used by the Underlying Fund, under “Derivative Risk” in the Prospectus of the Underlying Fund.

The Underlying Fund may also invest some or all of its assets in other investment funds, including Underlying Funds and ETFs, that may or may not be managed by the Manager (or one of its affiliates or associates), in order to gain indirect exposure to appropriate markets, sectors or asset classes. The Underlying Fund may invest in investment funds managed by unaffiliated investment managers if there are no suitable investment opportunities in affiliated funds. The Underlying Fund may also invest in additional types of ETFs and silver pursuant to regulatory relief or as permitted pursuant to NI 81-102, as described under “ETF Relief” in “Specific Information About Each of the Mutual Funds Described in This Document”. Investments by the Underlying Fund in securities of other investment funds and/or silver may be done directly or indirectly, through a specified derivative, or, in the case of silver, in silver certificates. Underlying Funds will be selected with consideration for the Underlying Fund’s investment objective and strategies, past performance and volatility, among other factors. Please see “Investments in Underlying Funds” in the Prospectus of the Underlying Fund.

The Underlying Fund may invest up to 20% of its net assets in foreign government, government agency or permitted supranational agency (as defined in NI 81-102) issued or guaranteed debt securities with a minimum credit rating of “AA”, and similarly, up to 35% of its net assets in foreign government, government agency or permitted supranational agency issued or guaranteed debt securities with a minimum credit rating of “AAA”. Please see “Foreign Government Debt Relief” in the Prospectus of the Underlying Fund.

The Underlying Fund may invest in People’s Republic of China (“PRC”) Domestic Bonds traded on the China Interbank Bond Market, or PRC Corporate Bonds traded on the SSE or SZSE, through the Bond Connect Program. Please see “Securities Connect Risk” in the Prospectus of the Underlying Fund.

The Underlying Fund may hold a portion of its assets in cash or short-term money market securities for administrative purposes or while searching for investment opportunities and/or due to general market, economic or political conditions.

The Underlying Fund may also enter into securities lending, repurchase and reverse repurchase transactions to generate additional income and/or as a short-term cash management tool. For more information see “Securities Lending, Repurchase and Reverse Repurchase Transaction Risk” in the Prospectus of the Underlying Fund.

Risks

Where a segregated fund invests in units of an underlying fund, the segregated fund may be exposed to the risks associated with the underlying fund.
