Updated January 2026

The above rates are the combined federal and provincial marginal rates, including all surtaxes, that apply to the actual amount of interest and regular income, capital gains, and dividends received. It is assumed that the only credit claimed is the basic personal amount. These rates are based on federal and provincial budget proposals and news released as of January 2026. Eligible dividends: Dividends paid by corporations resident in Canada from income that has been subject to the general federal corporate tax rate (public corporations, CCPCs from eligible dividends received from public corporations, and other Canadian resident corporations subject to the general corporate rate). Non-eligible dividends: Dividends paid by Canadian-controlled private corporations (CCPC) that is from income that is eligible for the small business deduction (SBD) or from investment income other than income from eligible dividends from public corporations. The marginal rates for dividend income reflects the maximum amount of the non-refundable dividend tax credit.
