## How to read the Fund Facts: Manulife Segregated Funds

1. **Fund name:** This is the full name of the segregated fund within your contract.
2. **Date fund available:** This is the date on which the fund was first made available in your contract. It is also the date from which we measure performance.
3. **Date fund created:** This is the date on which the fund became available for sale in other Manulife segregated fund products. This date may be older than the Date Fund Available as the fund may have been previously offered under another Manulife segregated fund contract.
4. **Fund manager/Underlying fund manager:** This is the name of the fund management company that manages the fund or the underlying fund.
5. **Total units outstanding:** This is the total number of units outstanding for all classes of the fund.
6. **Total fund value:** This is the total market value for all classes of the fund's assets.
7. **Portfolio turnover rate:** This is a measure of how frequently assets within the fund are bought and sold. A portfolio turnover rate of 100% is equivalent to the fund buying and selling all of the holdings in its portfolio once in the course of the year.
8. **Guarantee option:** This section lists the guarantee options available within the contract.
9. **Minimum investment:** This is the minimum initial deposit amount required.
10. **Management Expense Ratio (MER):** MERs include all expenses of the segregated fund such as the management fee, insurance costs, operating costs and applicable sales tax. There is no duplication of fees from the underlying pooled funds, unit trust, mutual funds or other investment funds. If the fund was launched after the Performance Date, the MER is an estimate for the current year and is subject to change.
11. **Management Fee:** The management fee of a fund is calculated and accrued on a daily basis and paid to Manulife for the management of the fund and guarantee costs. You do not directly pay for the management fees as they are paid by the fund.
12. **Net asset value per unit:** The value of each unit in the fund as at the date shown. The total market value of the fund's assets, minus their liabilities, divided by the number of units outstanding.
13. **Units outstanding:** This is the total number of units outstanding for the Sales Charge Option.
14. **What does this fund invest in?**
  - **Underlying Fund:** The underlying investments of the fund may be units of pooled funds, unit trust, mutual funds or other investment funds. When a transaction (e.g. deposit or withdrawal) is made in a fund, the transaction will purchase or redeem units of the underlying fund that corresponds to the fund. For example, if you purchase units of the Manulife Bond segregated fund, the fund invests in units of the Manulife Bond mutual fund. Each fund may also contain a small cash component in addition to the underlying investment. The goal of the fund-on-fund strategy is to produce returns consistent with, and based on, the underlying fund.
  - **Top 10 Investments:** This lists the top 10 investments of the fund or the underlying fund. It is listed beginning with the highest weighting to the lowest. The holdings may change due to ongoing portfolio transactions. The total number of investments of the (underlying) fund will be listed at the bottom of this section. If you would like more current information, please refer to our website at [www.manulifeim.ca](http://www.manulifeim.ca).
  - **Investment Segmentation:** This pie chart represents the breakdown of the fund's investment portfolio by investment type.
15. **Are there any guarantees?** This states that guarantees are provided under this contract.
16. **Who is this fund for?** This states a general description of the type of investor the fund would be suitable for.

## How to read the Fund Facts: Manulife Segregated Funds

### 17. How has the fund performed?

- **Average Return:** This states how much a \$1,000 investment in the fund would be worth when the most basic guarantee option was chosen and the average annual return as a percentage for the years shown. For any fund with less than one-year history, the information is not provided due to insufficient segregated fund history.
- **Year by Year Returns:** This chart shows you the fund's annual performance. Each bar shows in percentage terms how much an investment made on January 1 would have changed by December 31 in that same year. For any fund with less than one-year history, the graph is not provided due to insufficient segregated fund history.

### 18. How risky is it?

The risk rating measures a fund's fluctuation in monthly returns. A fund with high risk has experienced larger fluctuations of monthly returns than a fund with low risk. While higher risk funds may be more volatile in the short term, over the long term (10 years or more) a higher risk fund will generally earn more than a lower risk investment. Generally, the greater the return you want to earn on your investments, the greater risk you have to assume. This increased gain is what investors expect in exchange for assuming the higher risk of these volatile investments. You can use the overall risk rating for each investment option to choose the investments that fit with your investment strategy.

### 19. How much does it cost?

This describes the fees and expenses to buy, own and sell units of the fund.

- **Sales Charges:** This shows the percentage amount of any sales charge options and a description for each of how they work.
- **Ongoing fund expenses:** This describes the MER for the fund and any additional charges for different guarantee options.
- **Fund Fee Rate (will only be displayed if applicable):** This is a separate guarantee fee applicable to specific products and/or Series.
- **Trailing commission:** This describes the ongoing commission paid to your advisor while you hold the fund.

### 2. Ongoing Fund Expenses

The management expense ratio (MER) includes the management fee and operating expenses of the fund and, if applicable, any underlying fund(s). The MER includes the insurance cost for the guarantee. You don't pay these expenses directly. MERs and guarantee fees affect you because they reduce the return you get on your investment.

**Manulife is currently waiving the management fee of this fund, at its discretion.** Rather, Manulife is receiving a negotiated fee from Manulife Bank at a level that allows the fund to provide an interest rate comparable to the returns of Canadian money market segregated funds with similar features. This fee arrangement may change or be terminated at any time. **In the event the fee arrangement is terminated, a management fee not exceeding 1.0% may be charged to the fund.** For details about how the guarantees work, see your Information Folder and Contract.

#### Trailing commission

Manulife pays a trailing commission of up to 0.25% of the value of your investments each year for as long as you own the fund. It is for the services and advice your advisor provides to you. The trailing commission is paid out of the management fee. You don't pay these expenses directly. The rate depends on the sales charge option you choose.

Guarantee option	MER (Annual rate as a % of the fund value)	Management fee (%)	Fund fee rate (%)
IncomePlus v2.1	0.00	0.00	0.55

### 3. Other Fees

Trading Fees apply to all guarantee options and sales charge options and are paid to Manulife.

Fee	What you pay
Frequent Trading Fee	2% of the value of units you trade for switches exceeding 5 per year.
Early Withdrawal Fee	2% of the value of units you sell or transfer within 90 days of buying them.
Small Policy Fee	\$100 annual fee is applied to IncomePlus v2.1 with a GWB Benefit Base that is below the initial deposit minimum.

You don't pay these expenses directly. Additional fees will apply to the IncomePlus v2.1 guarantee option and are paid out of the contract each year. The fund fee rate for this fund is a Level 2. MERs and guarantee fees affect you because they reduce the return you get on your investment. For details about how the guarantees work, see your Information Folder and Contract.

IncomePlus v2.1	2.45	1.93	0.75

### Trailing commission

Manulife pays a trailing commission of up to 1.00% of the value of your investments each year for as long as you own the fund. It is for the services and advice your advisor provides to you. The trailing commission is paid out of the management fee. You don't pay these expenses directly. The rate depends on the sales charge option you choose.

## 3. Other Fees

Trading Fees apply to all guarantee options and sales charge options and are paid to Manulife.

Fee	What you pay
Frequent Trading Fee	2% of the value of units you trade for switches exceeding 5 per year.
Early Withdrawal Fee	2% of the value of units you sell or transfer within 90 days of buying them.
Small Policy Fee	\$100 annual fee is applied to IncomePlus v2.1 with a GWB Benefit Base that is below the initial deposit minimum.

## What if I change my mind?

You can change your mind about your investment in a fund within two business days of the earlier of the date you received confirmation or five business days after it is mailed. You can also change your mind about subsequent transactions you make under the contract within two business days of the earlier of the date you received confirmation or five business days after it is mailed. In this case, the right to cancel only applies to the new transaction.

You have to tell us in writing that you want to cancel. The amount returned will be the lesser of the amount you invested, or the value of the fund if it has gone down. The amount returned only applies to the specific transaction and will include a refund of any sales charges or other fees you paid.

## Objective and Strategy

**Objective:** This Fund seeks a steady flow of income with reasonable safety of capital by investing primarily in a combination of fixed-income and equity securities of issuers anywhere in the world.

**Strategy:** When selecting equity securities, the portfolio advisor uses a five step value-oriented investment selection approach which involves studying industries and companies to gain a deeper understanding of fundamental conditions and competitive forces, estimating the value of the companies using a cash flow analysis, comparing those values to current stock prices to ensure both significant potential upside and to provide a margin of safety, ensuring consistency in the overall analysis across all prospective investments; and, finally when selecting securities for the portfolio, emphasizing securities with a higher yield. The strategy for this fund is available through the Investment Policy Statement (IPS).

You don't pay these expenses directly. Additional fees will apply to the IncomePlus v2.1 guarantee option and are paid out of the contract each year. The fund fee rate for this fund is a Level 3. MERs and guarantee fees affect you because they reduce the return you get on your investment. For details about how the guarantees work, see your Information Folder and Contract.

The trailing commission is paid out of the management fee. You don't pay these expenses directly. The rate depends on the sales charge option you choose.

## 3. Other Fees

Trading Fees apply to all guarantee options and sales charge options and are paid to Manulife.

Fee	What you pay
Frequent Trading Fee	2% of the value of units you trade for switches exceeding 5 per year.

You don't pay these expenses directly. Additional fees will apply to the IncomePlus v2.1 guarantee option and are paid out of the contract each year. The fund fee rate for this fund is a Level 4. MERs and guarantee fees affect you because they reduce the return you get on your investment. For details about how the guarantees work, see your Information Folder and Contract.

IncomePlus v2.1	2.72	1.90	1.15

Trailing commission

The trailing commission is paid out of the management fee. You don't pay these expenses directly. The rate depends on the sales charge option you choose.

3. Other Fees

Trading Fees apply to all guarantee options and sales charge options and are paid to Manulife.

Fee	What you pay
Frequent Trading Fee	2% of the value of units you trade for switches exceeding 5 per year.

2. Ongoing Fund Expenses

The management expense ratio (MER) includes the management fee and operating expenses of the fund and, if applicable, any underlying fund(s). The MER includes the insurance cost for the guarantee. You don't pay these expenses directly. Additional fees will apply to the IncomePlus v2.1 guarantee option and are paid out of the contract each year. The fund fee rate for this fund is a Level 4. MERs and guarantee fees affect you because they reduce the return you get on your investment. For details about how the guarantees work, see your Information Folder and Contract.

IncomePlus v2.1	2.78	1.89	1.15

Trailing commission

Manulife pays a trailing commission of up to 1.00% of the value of your investments each year for as long as you own the fund. It is for the services and advice your advisor provides to you. The trailing commission is paid out of the management fee. You don't pay these expenses directly. The rate depends on the sales charge option you choose.

3. Other Fees

Trading Fees apply to all guarantee options and sales charge options and are paid to Manulife.

Fee	What you pay
Frequent Trading Fee	2% of the value of units you trade for switches exceeding 5 per year.

# Potential risks of investing

The underlying investments of the segregated funds may be units of mutual funds, pooled funds or other selected investments. The risk factors of the underlying investments directly affect those investments and will also affect the segregated funds. For a comprehensive disclosure of the risks of these underlying funds, refer to the simplified prospectus or other disclosure documents of the underlying funds, copies of which are available upon request.

**Asset-backed and mortgage-backed risk:** If there are changes in the market's perception of the issuers of asset backed or mortgage backed securities, or in the credit worthiness of the parties involved, then the value of the securities may be affected. In addition, for asset-backed securities, there is a risk that there may be a mismatch in timing between the cash flow of the underlying assets backing the security and the repayment obligation of the security upon maturity. In the use of mortgage-backed securities, there are also risks that there may be a drop in the interest rates charged on mortgages, a mortgagor may default in its obligations under a mortgage or there may be a drop in the value of the property secured by the mortgage.

**Concentration Risk** occurs when a Fund, including an underlying Fund, invests in a portfolio of relatively few securities. As a result, the securities invested in may not be diversified across all sectors or they may be concentrated in specific regions or countries. By concentrating its investment, a significant portion of the Fund or the underlying Fund may be invested in a single security. This may result in higher volatility, as changes in the market value of an individual security will have a greater impact on the value of the Fund's portfolio. It may also result in a decrease in the liquidity of the Fund's portfolio.

**Credit risk** is the risk of default by the issuer of debt instruments, such as bond or money market instruments. Default will negatively impact the value of assets within the underlying fund, thus lowering the overall return of the Fund.

**Corporate class risk:** Certain underlying funds are structured as classes of shares of a single corporation which may contain multiple funds. Each corporate class fund has its own assets and liabilities, and each fund will be charged separately for any expenses that are specifically attributable to that fund. However, each fund's assets are the property of the corporation. Therefore, if a fund cannot meet its obligations, the assets of the other funds of the corporation may be used to pay those obligations.

**Cybersecurity Risk** is the risk of cyber-attacks or data breaches of technological systems that may result in the disclosure of confidential information, unauthorized access to sensitive information, the destruction or corruption of data, and financial loss to the Fund. Manulife and its service providers use technology in virtually all aspects of business and operations including that of the Fund. As a result, Manulife has and requires its service providers to have a robust and evolving information security program that features policies, processes, technologies, and dedicated professionals that protect information, systems, and networks. Despite this, there can be no assurances that these measures will be successful in protecting our networks and information assets against attacks in every instance. This is because cyber-attack techniques are changing frequently, increasing in sophistication, are often not recognizable until launched, and can originate from a wide variety of sources. As a result, Manulife and its service providers may not be able to anticipate or implement effective preventive measures against all disruptions or privacy and security breaches. Cyber-attacks could result in violation of privacy laws or information security regulations, or could materially disrupt network access or business operations.

**Derivative risk** occurs when derivatives are used as a risk management tool to mitigate risks or diversify risks that are not desired. Some Funds and underlying mutual funds may invest in derivatives for hedging purposes, for achieving the duration target or for replicating the approximate return of a direct investment in the underlying mutual funds(s). A Fund's ability to dispose of the derivatives depends on the liquidity of such positions in the market, if the market direction goes against the manager's forecast, and the ability of the other party to fulfill its obligations. Therefore, there is no guarantee that transactions involving derivatives will always be beneficial to the Fund. The use of derivative instruments is prohibited in acquiring investment exposures not otherwise permitted in the Fund's investment description.

**Sustainability (Environmental, Social, and Governance (ESG)) Policy Risk:** An ESG Fund's ESG investment policy could cause it to perform differently compared to similar funds that do not have such a policy. Any criteria related to this ESG investment policy may result in the ESG Fund's forgoing opportunities to buy certain securities when it might otherwise be advantageous to do so, or selling securities for ESG reasons when it might be otherwise disadvantageous for it to do so. Furthermore, information and third party data used to evaluate certain ESG characteristics of a company or asset may be incomplete, inaccurate or unavailable, which may impact the portfolio advisor's investment assessment or its ability to determine accurately the ESG characteristics or practices of some company or assets or the evolution over time of those ESG characteristics or practices. In addition, investors may differ in their views on what constitutes positive or negative ESG characteristics. As a result, the companies in which an ESG Fund invests, directly or indirectly, may not reflect the beliefs and values of any particular investor. An ESG Fund will vote proxies in accordance with the Manager's Proxy Voting Policy.

**Exchange-traded fund risk:** Certain Funds may invest in securities of exchange-traded funds (ETFs). These ETFs seek to provide returns similar to the performance of a particular market index or industry sector index. ETFs may not achieve the same return as their benchmark market or industry sector indices due to, among other things, differences in the actual weights of securities held in the ETF versus the weights in the relevant index (any such differences are usually small) and due to the operating and management expenses of the ETFs. An ETF may, for a variety of reasons, also fail to accurately track the market segment or index that underlies its investment objective. The price of an ETF can also fluctuate and the value of Funds that invest in securities offered by ETFs will change with these fluctuations.

**Foreign currency risk** occurs when an underlying fund invests in countries other than Canada or holds assets valued in another currency, which may decline in value relative to the Canadian currency. This situation will adversely affect the returns of those foreign assets held in the underlying fund and the total return of the Fund.

**Inflation risk** is the risk that inflation will affect interest rates and, in turn, make assets within an underlying fund less attractive from a price perspective, thus hurting the overall performance of the Fund.

**Interest rate risk** is the chance that interest rates may fluctuate, and thereby may negatively impact the value of the assets within an underlying fund, thus lowering the overall return of the Fund.

**Liquidity risk** is the risk that an investment cannot be easily converted into cash. An investment may be less liquid if it is not widely traded, if there are restrictions on the exchange where the trading takes place or due to legal restrictions, the nature of the investment itself, settlement terms, or for other reasons such as a shortage of buyers interested in a particular investment or an entire market. Investments with low liquidity can have dramatic changes in value and can result in loss.

**Manager risk** is the chance that a fund manager may purchase a poor asset or may dispose of an asset which continues to grow in value; the fund manager may fail to recognize increasing or decreasing market conditions. Any or all of these can directly affect the performance of the Fund.

**Real estate risk:** Real estate by nature is not a liquid asset. There is no formal market for trading in real property and very few records are available to the public, which give terms and conditions of real property transactions. It may take time to sell real estate investments at a reasonable price, limiting the funds ability to respond quickly to changes in economic or investment conditions.

**Securities lending, repurchase, and reverse Repurchase transaction risk:**

Funds may engage in securities lending, repurchase and reverse repurchase transactions directly, or may be exposed to these transactions indirectly because of the underlying funds in which they invest. While securities lending, repurchase and reverse repurchase transactions are different, all three arrangements involve the temporary exchange of securities for cash with a simultaneous obligation to redeliver a like quantity of the same securities at a future date. Securities lending is an agreement whereby a fund lends securities through an authorized agent in exchange for a fee and a form of acceptable collateral. Under a repurchase transaction, a fund agrees to sell securities for cash, while at the same time assuming an obligation to repurchase the same securities for cash, usually at a lower price and at a later date. A reverse repurchase transaction is a transaction in which a fund buys securities for cash and simultaneously agrees to resell the same securities for cash, usually at a higher price and at a later date.

The risks associated with securities lending, repurchase and reverse repurchase transactions arise when a counterparty, whether it be the borrower, seller or buyer, defaults under the agreement evidencing the transaction. The fund is then forced to make a claim in order to recover its investment. In securities lending or repurchase transactions, the fund could incur a loss if the value of the securities loaned or sold has increased relative to the value of the collateral held by the fund. In the case of a reverse repurchase transaction, the fund could incur a loss if the value of the securities purchased by the fund decreases in value relative to the value of the collateral held by the fund. To limit the risks associated with these transactions, a fund would adhere to controls and limits that are intended to offset these risks and by limiting the amount of exposure to these transactions. A fund would also typically deposit collateral only with lenders that meet certain criteria for creditworthiness and only up to certain limits. Small company risk is the result of smaller companies having valuations that tend to be more volatile than those of large established companies. As such, the value of Funds that buy investments in smaller companies may rise and fall significantly.

**Sovereign risk** applies when investing abroad as there may be additional risk of the Fund's capital to companies outside of the laws of Canada. Information flow, liquidity, political stability, and social policy may all affect the prices of foreign investments and in return the value of the assets within the Fund, thus hurting the overall performance of the Fund.

**Specialization risk:** Some Funds specialize in investing in a particular industry or part of the world. Specialization allows the portfolio advisor to focus on specific areas of the economy, which can boost profits if both the sector and the companies selected prosper. However, if the industry or geographic area experience challenges, the Fund will suffer because there are relatively few other exposures to offset and because securities in the same industry tend to be affected by challenges in a similar manner. The Fund must follow its investment objective and may be required to continue to invest primarily in securities in the industry or geographic area, whether or not it is prosperous.

**Substantial securityholder risk:** A Fund may have one or more substantial investors who hold a significant amount of securities of the Fund, such as a financial institution or a Top Fund. If a substantial investor decides to redeem its investment in a Fund, the Fund may be forced to sell its investments at an unfavourable market price in order to accommodate such request. The Fund may also be forced to change the composition of its portfolio. Such actions may result in considerable price fluctuations to the Fund's net asset value and negatively impact on its returns. The Funds do, however, have policies and procedures designed to monitor, detect and deter inappropriate short-term or excessive trading. See "Short-Term Trading".

**Underlying fund risk** applies where a segregated fund that invests in units of an underlying fund may be exposed to the risks associated with the underlying fund.
